* Additional Features are highlighted in green

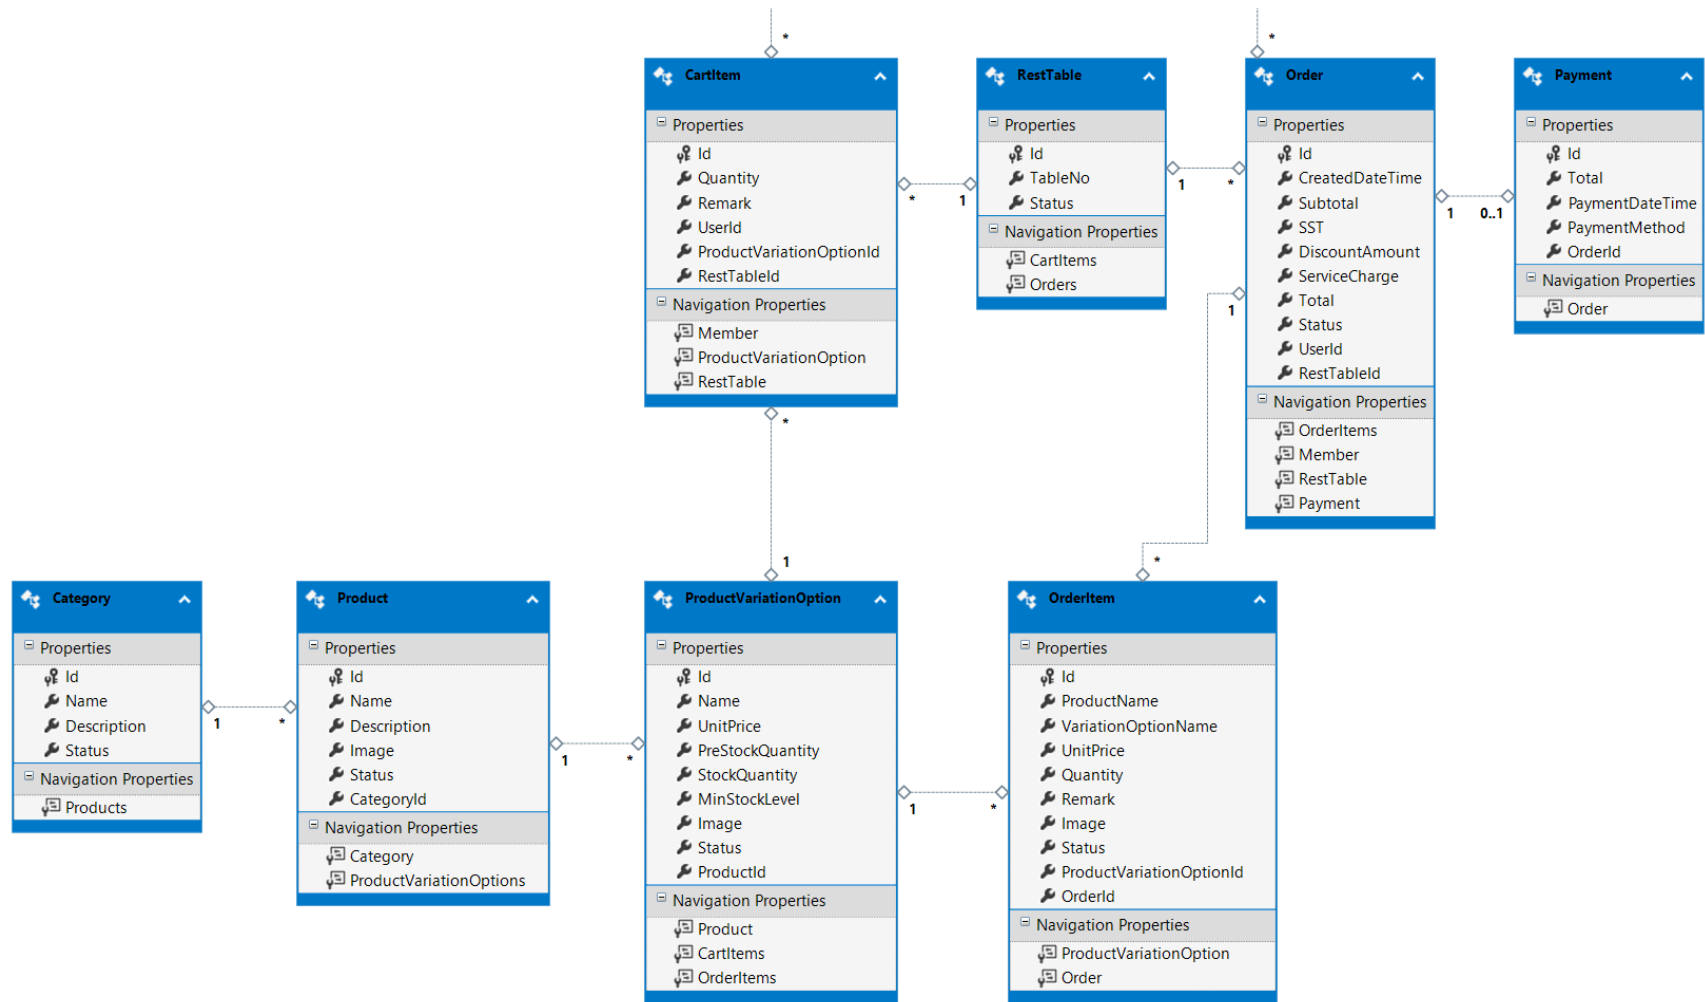

<u>1. Table Management (Admin)</u> PIC: Lum Win Kong • Table Management (CRUD) • AJAX Integration (Searching, Filtering, Sorting, Paging) • Batch Delete • Set Table Device • View Customer Side <u>2. Order Management (Admin)</u> PIC: Lum Win Kong • Create Order • Add Order Item to Active Order • Product Stock Deduction <u>3. Cart Management (Admin & Customer)</u> PIC: Lum Win Kong • Shopping Cart (Add Item) • Shopping Cart (Update or Remove Item) • AJAX Integration (Delete Item & Clear Cart) • Product Stock Validation <u>4. Ordering & Payment (Customer)</u> PIC: Lum Win Kong • Checkout (Add Order) • Add New Order Item to Existing Order • Order Item Status Validation • Link Active Guest Orders to a Logged-in Member's Account • Payment (Stripe API) • Payment (Pay at Counter) • Email Notification (E-Receipt) • Redeem Points to Receive a Discount • Earn Points upon Successful Payment <u>5. Order History (Customer)</u> PIC: Lum Win Kong • Order Listing & Detail • AJAX Integration (Searching, Paging)	<u>10. Security (Admin & Customer)</u> PIC: Victor Pow Yie Yuaw • Roles: Admin & Member • Login & Logout & Register (Referral) • Password Hashing • Forgot Password (Token) • Login Blocking • Role Authorization • Deny Random Link Parameter Access • Google ReCaptcha • Account Verification (Token Verification) • WebCam Integration • QRCode Scanning • Continue as Guest <u>11. Ordering Management (Admin)</u> PIC: Victor Pow Yie Yuaw • Order Detail • Order Table Listing • Table Searching • Order Status Update • Order Item Status Update • Item + Order Cancellation • Earn Points upon Successful Payment. • AJAX Filtering • Email Receipt • Product Stock Restock (if cancel order or order item) <u>12. Order History (Admin)</u> PIC: Victor Pow Yie Yuaw • Order History Details • Pagination
--	---

<u>6. Exception and Error Handling (Admin & Customer)</u> PIC: Lum Win Kong • Displays Custom Error Pages (for error status code page) <u>7. Admin & Member Management (Admin)</u> PIC: Pang Yu Hang • Admin Account Maintenance (CRUD) • Member Account Maintenance (CRUD) • Profile Photo Upload • Profile Photo Resizing & Cropping • Basic Search and Filter • Block & Unblock Account • Email Send QR Referral Code • QRCode Generation <u>8. Category & Product Management (Admin)</u> PIC: Mong Kel Heng • Category Maintenance (CRUD) • Product Maintenance (CRUD) • Product Photo Upload • Product Photo Resizing & Cropping • Product Variations • Batch Insert, Update and Delete (Product Variations) • Multiple Photos Upload per Form Submission (Product Variations) • AJAX Searching, Sorting and Paging • Product Stock Update • Product Stock Alert <u>9. Product Catalog (Admin & Customer)</u> PIC: Mong Kel Heng • Product Listing & Detail • Product Filtering (Category & Price Range) • Member and Product Analytics (Dashboard) • Product Sales Analytics (Dashboard) • AJAX Searching, Sorting and Paging	
---	--

2. Entity Class Diagram

3. Monetization Models

We propose the following software monetization models for making our system sustainable:

(A) License

Description:

The license model charges restaurants a fixed or tiered recurring fee, providing cost-effective access to streamline operations. Designed for small to mid-sized dining establishments, this recurring license allows restaurants to pay monthly or annually, ensuring affordability while granting ongoing access to essential and advanced features. It also enables the software provider to deliver updates, new features, and support, ensuring continued value for clients.

Pricing Structure:

Plan	Features	Monthly Price	Annual Price (10% Discount)
Basic Plan	- Product and category management - Order management - Table management - Customer-Side features	RM 200	RM 2,160
Pro Plan	- All Basic Plan features - Order item management - Member management - Promotion and discount management - Dashboard and reporting tools	RM 400	RM 4,320

Revenue Estimate:

Plan	Number of Restaurants	Monthly Revenue	Annual Revenue
Basic Plan (Monthly)	100	$100 \times \text{RM } 200 = \text{RM } 20,000$	$\text{RM } 20,000 \times 12 = \text{RM } 240,000$
Pro Plan (Monthly)	60	$80 \times \text{RM } 400 = \text{RM } 32,000$	$\text{RM } 32,000 \times 12 = \text{RM } 384,000$
Basic Plan (Annual)	20		$20 \times \text{RM } 2,160 = \text{RM } 43,200$
Pro Plan (Annual)	20		$20 \times \text{RM } 4,320 = \text{RM } 86,400$
Total	200	RM 52,000	RM 753,600

(B) Advertising

Description:

The advertising model monetizes the platform by displaying paid advertisements within the application. Advertisers, including partner restaurants, stakeholders, and external brands, can purchase ad slots to promote their products, announcements, or special events.

These ads will appear in prominent locations, such as:

- **Bottom of the screen**
- **Headers**
- **During checkout process**

The platform offers two pricing models:

1. **Pay-per-View (PPV):** RM 0.10 per view.
2. **Banner Ads:** RM 1,000 per month for static ad placements.

Revenue Projection and Detailed Calculations:

Ad Type	Details	Monthly Revenue Calculation	Monthly Revenue	Annual Revenue
Pay-per-View (PPV)	- 10 advertisers - 500 views per day per advertiser - RM 0.10 per view	500 views/day × 10 advertisers × RM 0.10 × 30 days	RM 15,000	RM 180,000
Banner Ads	- 5 external brands - RM 1,000 per advertiser per month	RM 1,000 × 5 external brands	RM 5,000	RM 60,000
Total			RM 20,000	RM 240,000

(C) Transaction Fees

Description:

The transaction fee model charges restaurants a percentage-based fee for every order processed through the system. By setting a competitive rate of **0.5% per order**, this model aligns with the system's usage, ensuring affordability for restaurants while generating scalable revenue as order volumes increase. This approach incentivizes restaurants to adopt the system without burdening them with high fees.

How It Works:

- **Transaction Fee:** 0.5% of the order value.
- **Assumptions:**
 - Each restaurant processes an average of **50 orders per day**.
 - The **average order value** is RM 30.
 - The system is used by **200 restaurants**.

Revenue Calculation:

Metric	Calculation	Value
Daily revenue per restaurant	50 orders × RM 30	RM 1,500
Monthly revenue per restaurant	RM 1,500 × 30 days	RM 45,000
Transaction fee per restaurant (monthly)	RM 45,000 × 0.5%	RM 225
Total monthly revenue (200 restaurants)	RM 225 × 200 restaurants	RM 45,000
Total annual revenue	RM 45,000 × 12 months	RM 540,000

(D) Support

Description:

The support model charges restaurants with a fixed fee for a time period. Yearly support packages are provided to the clients where each package features a level of service and support to the food ordering system. This ensures that clients will pay yearly in order to enjoy any services provided.

Support packages:

Package	Description	Yearly Price
Basic	- Email support only - Response time: 48 hours - System maintenance (Fix bugs, minor improvements) - No training provided	RM 2,000
Standard	- Email and phone support - Response time: 24 hours - System maintenance and minor system upgrades (Add simple features, minor customisation) 1 training session annually for clients' staff	RM 5,000
Premium	- Email, phone and live chat support - Response time: 3 hours - System maintenance and major system upgrades (Add advanced custom features, major customisation) - Unlimited training sessions	RM 10,000

Assumptions:

- 15 companies purchase the Basic package
- 50 companies purchase the Standard package
- 25 companies purchase the Premium package

Revenue Estimate:

Package	Number of companies	Annual Revenue
Basic	15	RM 2,000 x 15 = RM 30,000
Standard	50	RM 5,000 x 50 = RM 250,000
Premium	25	RM 10,000 x 25 = RM 250,000
Total	90	RM 530,000

A screenshot of a web application's login page. The page has a light green background and an orange header bar. In the top left corner of the header is a small circular logo. The word "Login" is centered in a large, bold, black font. Below it are two input fields: "Email:" and "Password:". Below the password field is a checkbox labeled "Remember Me". Underneath the checkbox are three links: "Register", "Forgot Password", and "Resend Verification". Below these links is a Google reCAPTCHA widget with the text "I'm not a robot" and the reCAPTCHA logo. At the bottom center is a large, rounded orange button with the word "Login" in white text.

A screenshot of the same login page, but with a message indicating a failed login attempt. A pink rectangular box at the top center contains the text "Account Locked! Check Email To Unblock." Below this, the word "Login" is still centered. The "Email:" and "Password:" input fields are now highlighted with a yellow background. The "Email:" field contains the text "powyieyuaw@gmail.com" and the "Password:" field contains seven dots. The "Remember Me" checkbox is visible at the bottom, but the links and reCAPTCHA widget are not visible in this screenshot.

The image shows a web interface for a referral system. At the top, there is an orange header bar with a small circular logo on the left. The main content area has a light green background. The word "Referral" is centered at the top in a large, dark font. Below it is a dark blue square containing a white QR code with a circular logo in the center. A white border with corner brackets surrounds the QR code. Below the QR code is an orange button with the text "Stop Scanning". Underneath this is the word "OR" in a small, dark font. Below "OR" is the text "Invitation Code:" followed by a white input field with a small "x" icon on the right. Below the input field is an orange button with the text "Enter". At the very bottom of the interface, there is a small line of text: "© 2024 BMIT2023. All Rights Reserved."

The image shows a web interface for the "Forgot Password" feature. It has a light green background. The title "Forgot Password" is centered at the top in a large, dark font. Below the title is the text "Email:" followed by a white input field. At the bottom of the interface is an orange button with the text "Get Token Link".

Changing Password:

A screenshot of a web form for changing a password. The form is contained within a light gray box with a thin orange border. It features three input fields, each with a label above it: "Old Password", "New Password", and "Confirm New Password". All three fields contain seven black dots, indicating masked text. The "Confirm New Password" field is currently selected, highlighted with a blue border, and has a vertical cursor at the end of the masked text. Below the input fields, there are two buttons: a gray "Cancel" button and an orange "Save Changes" button.

Password changed successfully!
